

Palindrome After Remove The Character

```
import java.util.Scanner;

public class PalindromeAfterRemoveTheChar{

    static boolean isPalindrome(String str) {

        int left = 0;
        int right = str.length() - 1;
        while (left < right) {
            if (str.charAt(left) != str.charAt(right)) {
                return false;
            }
            left++;
            right--;
        }

        return true;
    }

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter a string: ");
        String str = sc.nextLine();

        System.out.print("Do you want to remove a character? (yes/no): ");
        String choice = sc.nextLine();

        if (choice.equalsIgnoreCase("yes")) {

            System.out.print("Enter the character to remove: ");
            char ch = sc.next().charAt(0);

            int index = str.indexOf(ch);

            if (index != -1) {
                str = str.substring(0, index) + str.substring(index + 1);
            }
        }
    }
}
```

```
        System.out.println("String after removing '" + ch + "': " + str);
    } else {
        System.out.println("Character not found in the string.");
    }
}

if (isPalindrome(str)) {
    System.out.println("Palindrome");
} else {
    System.out.println("Not Palindrome");
}

sc.close();
}
```

Output:

Enter a string: abbca
Do you want to remove a character? (yes/no): yes
Enter the character to remove: c
String after removing 'c': abba
Palindrome
